School Marks Analytics — guide for the Teacher role.

Teachers enter and submit marks for assigned papers, request leave, respond to leadership notices, review their own class analytics, upload photos for their classes, and (if they are a class teacher) download consolidated lists for their section when every paper is approved.

1. Getting access and signing in

1.1 Request access

- Ask your principal for the school's join code (shown on the school's School profile !' Modules & Security).
- Open /signup, enter the join code, and complete your details (name, email, school ID, password, role).
- Wait until leadership activates your account and assigns your class + subject papers. You cannot enter marks until both are done.

  Alternatively, leadership may create your account and share credentials. If they reset your password, you may be asked to change it on first login.

1.2 Sign in

- Open the login page.
- Enter email, school ID, and password.
- If MFA is on, enter the authenticator code.

  You land on the Teacher desk: your papers for the current exam, register status, notices, section strength, students to watch, and My leave.

2. Teacher desk and notices

- Switch exams with the exam selector (you share the same latest exam as leadership by default).
- Notices appear on the desk and in the bell (deadlines, incomplete marklists, late-entry/edit decisions, staff messages). Open a notice to jump into the relevant register.
- Metrics show your average, student count, sections, and how many registers still need finishing.
- Class teachers see Class inbox (pending papers for their sections) and can open consolidated lists when every paper is approved.
- Open the ? hint on any page for a short "what's on this page" tip. Download this guide from HELP !' User manuals.

2.1 My leave

On the Teacher desk, My leave lets you request dates for approval.

- Set Start and End, and an optional Reason (for example sick leave, personal, training).
- Click Request leave. The request shows as Awaiting approval until leadership confirms it.
- You can Cancel a pending request. Once Approved, it overlays school timetables and notifies the principal, vice principal, supervisors, and co-ordinators so they can arrange cover.

  You do not approve other teachers' leave or assign substitutes unless the principal has granted those features under Role access.

3. Entering marks

3.1 Mark register (Marks !’ Mark register)

- Choose the exam, class/section, and subject you teach.
- Enter numeric marks within the paper’s max marks.
- Use special codes where needed:

Code	Meaning
AB	Absent
EX	Exempt
WH	Withheld

- Split papers show Theory max / Practical max and Th / Pr columns. Codes apply to theory only — enter a number in Practical.
- Elective papers show — (Not enrolled) for students who are not on that paper. Do not enter a mark for them.
- Save draft as you work. Drafts are not visible in school analytics or consolidated lists.
- When the paper is complete, Submit for principal / co-ordinator approval.

  Only approved marks feed ranks, school reports, and official consolidated lists. After submit, you generally cannot edit without an approved access request.

3.2 Bulk upload (Marks !’ Bulk upload)

- Download the template for your class and exam.
- Fill the spreadsheet, upload, and review the preview.
- Commit only when the preview matches the roll (missing students and bad values are flagged first).

3.3 Class teacher read access

If you are the class teacher of a section, you can open that section’s full register in a read-only view for papers you do not teach — useful to see which subject registers are still empty or awaiting approval.

3.4 Late entry and edit requests

If the deadline has passed, or you need to change a submitted register:

- Request late entry or edit access (from the register flow / access request path leadership uses).
- Wait for principal or co-ordinator approval (you will get a notice).
- Complete or correct the register, then submit again if required.

Do not ask for late access unless a genuine correction is needed — grants are audited.

---

4. Consolidated lists (class teachers)

Marks !’ Consolidated lists appears when you are class teacher of at least one section.

- Choose exam !’ your class !’ division.
- You only see the list when every subject register for that section is fully approved. Incomplete divisions are not shown to class teachers.
- Download Excel or PDF for your section’s official list once it is ready.

4. Class teacher — inbox and consolidated lists

If you are the class teacher for a section:

- Open Marks !’ Class inbox to see which subject papers are still missing marks or waiting for approval.
- Open a register (read-only for papers you do not teach) to check progress.
- When every subject is approved, open Consolidated lists for your section and download Excel/PDF.

Leadership can preview incomplete lists; class teachers cannot.

5. Hall tickets and student photos

5.1 Hall tickets

Marks !’ Hall tickets — teachers can view and download tickets for their classes (Download PDF (5 / A4)). Principals and co-ordinators create and edit batch details (venue, instructions, Print student photos when available). If a PDF will not download, ask leadership to set each paper’s date and start time under Records !’ Exams (or copy a completed class timetable onto the other classes).

5.2 Student photos

Marks !’ Student photos — upload and clear passport-style photos for students in classes you are assigned to. Photos appear on hall tickets when printing is enabled.

- Bulk upload by admission no — name files like ADM-10B-01.jpg, then Match & upload. Use Remove unmatched for files that did not match.
- Or add one photo per student in the table.
- PNG or JPEG, 1 MB or smaller.

Leadership can update any student. Keep photos current before printing hall tickets.

6. Insights (your lens)

Under Insights !’ Marks analysis teachers typically use:

Report	What you get
Classes	Your sections: subject stats and rankings
Students	Search a student you teach; trends, strengths/weaknesses, report card

School-wide subject/teacher leaderboards, Compare, and Deep insights are leadership tools. Your desk already summarises your papers and students to watch.

7. CPD

If Continuing Professional Development is enabled for the school, open CPD to see your training plans, observations, appraisals, and certificates. Leadership records observations and appraisals against your file.

8. Profile and security

Account !’ Profile:

- Keep name and email current.
- Change your password.
- Enable MFA (authenticator app) and store recovery codes safely.

9. Typical teacher checklist (per exam)

- Confirm your assigned papers on the Teacher desk.

- Enter or bulk-upload marks (including Th / Pr where used); save drafts as you go.
- Double-check absences (AB / EX / WH) before submit.
- Submit each complete register before the deadline.
- Watch the bell for reminders or rejection/approval of access requests.
- If you need time off, submit My leave early so cover can be arranged.
- If you are class teacher, check when the section becomes ready for the consolidated list and download it.
- Upload student photos and download hall tickets for your classes when leadership has prepared them.
- Use Students analysis for parent meetings or remedial follow-up.

---

10. What teachers cannot do

Teachers do not:

- Approve or moderate other teachers' marks
- Manage staff, school profile, or whole-school records
- See incomplete consolidated lists
- Approve other teachers' leave or assign substitutes (unless Role access grants Leave approval / Assign substitutes)
- Open leadership-only analysis (school overview, subjects hub, teacher comparison, deep insights) unless their role features are customised by the principal

If Timetables is enabled for your role, you can open the page to view schedules. Otherwise your own timetable is available when leadership shares the staff Timetable link. You cannot edit the weekly grid.

If a paper is missing from your register list, ask leadership to check your assignments under Staff.
