Exam co-ordinator user manual

School Marks Analytics

Generated 2026-10-14

School Marks Analytics — guide for the Exam co-ordinator (co-ordinator) role.

The co-ordinator runs the exam operations desk: school records, teacher chase-ups, mark entry when needed, approvals, leave cover, consolidated lists, hall tickets, and operational analytics. You work alongside the principal; some school-admin actions (join code rotation, co-ordinator accounts, Role access) stay with the principal.

1. Sign in and home desk

- Open the app login page.
- Enter your email, school ID, and password.
- If MFA is enabled, enter the 6-digit code (or recovery code).

  You land on the Exam coordination desk (/): teachers still pending upload, papers awaiting approval, hardest subjects, subject correlations, upload queue, and access-request panels.

- Switch the working exam with the exam selector.
- Use the ? hint on each page for short guidance (How it is useful).
- Download this guide from HELP !’ User manuals.

  If you requested access via /signup, wait until the principal activates your account before you can use the desk.

2. School setup you own day to day

2.1 Records (School setup !’ Records)

Keep structure accurate so registers, hall tickets, analytics, and promotion stay correct.

Tab	What to do
Classes	Add a class with several divisions at once (Fill A–D for a quick start); assign class teachers per division. Use Registered class sections to expand a grade, search, and filter.
Subjects	Pool subjects with Max marks (mark entry); optional Practical max; Elective (enroll selected students only) plus Enrollments. Then pick which papers each class uses.
Students	Roll list; photos for hall tickets (or Marks !’ Student photos).
Exams	Exam calendar; Classes in this exam (choose which classes sit under the exam — editable later); per-class / per-subject paper dates and start times; Max marks [consolidation]; Lock for consolidation. Copy one class timetable to the others when useful.
Promote	Year-end promotion to the next section.

When scheduling an exam, choose which classes are included, then set one date for every paper or different dates per class and subject. Paper dates only appear for the classes you select.

2.2 Staff (School setup !’ Staff)

- Activate pending teacher sign-ups, or add / bulk-import teachers.
- The staff list is an accordion — expand a row for assignments, Transfer classes, and timetable.
- Assign class + subject papers to teachers. The principal can also assign papers to the principal, vice principal, and co-ordinators. Teachers need ACTIVE status and assignments before they can enter marks.
- You can create teacher accounts; only the principal can create another exam co-ordinator or change Role access.
- Open a teacher’s timetable from the staff row when needed.
- Notify one teacher or all teachers from Staff when useful.

Co-ordinators typically already have Timetables, Leave approval, and Assign substitutes. Ask the principal if a tab is missing.

2.3 Timetables (School setup !’ Timetables)

Same four tabs as the principal:

- Teachers — accordion. Search or filter by class and subject. Expand a row to Open timetable, Put on leave, or Hrs history (own teaching plus extra cover hours). Use Previous week / Next week, or From / To and Show range.
- Daily board — all teachers for one day. Click and drag to scroll periods. Rows show period count, teaching hours, and +extra cover hours. Vacated cells: Needs cover / Cover. Assign cover opens ranked substitutes.
- Find free — who is free, on leave, or teaching in a chosen period.
- Leave & cover — Pending leave requests (Approve / Reject), put a teacher on leave, and the Cover planner.

Working week and bell times are set under School profile !’ Bell Schedule & Timings.

Teachers request leave from My leave on their dashboard. Approved leave overlays timetables and notifies principal, vice principal, supervisors, and co-ordinators.

2.4 School profile (School setup !’ School profile)

Tabs: Identity & Affiliation, Campus & Contact, Modules & Security, Grading Framework, Bell Schedule & Timings.

Edit identity, logo, working week, bell schedule, grading bands, pass/distinction, exam weights, and digests.

- You can update most profile fields and the logo.
- The join code is on Modules & Security for sharing; rotating it is principal-only.
- Optional modules (Board ops / CPD) are controlled by the principal when saving.

---

3. Marks — enter, chase, approve

Unlike the principal, the co-ordinator can enter and bulk-upload marks as well as approve them.

3.1 Mark register (Marks !’ Mark register)

- Choose exam, class/section, and subject.
- Enter marks (or AB / EX / WH for absent / exempt / withheld).
- Split papers show Theory max / Practical max and Th / Pr columns. Codes apply to theory only.
- Elective papers show — (Not enrolled) for students who are not on that paper — skip those cells.
- Save draft — drafts stay out of analytics until submitted and approved.
- Submit for leadership approval (you or the principal can then Approve).

3.2 Bulk upload (Marks !’ Bulk upload)

- Download the spreadsheet template for the class and exam.
- Fill marks, then upload and preview (catches missing students and bad values).

- Commit when the preview looks correct.

3.3 Exam queue (Today !’ Exam queue)

Use the hub tabs:

Tab	Job
Missing	Chase empty registers (Mark progress); notify teachers.
Submitted	Approve submitted registers (canonical approval inbox).
Access requests	Late-entry and edit requests.
Ready for CML	Consolidated mark lists when papers are approved.

- Select the exam on Missing.
- Expand a teacher for papers, Notify, Open register, and Approve on Submitted.
- Notify teachers about deadlines or incomplete marklists (all pending, or one person).

Approved marks are what school analytics and consolidated lists use. Old links to Pending uploads / Approvals redirect into Exam queue.

3.4 Access requests (Exam queue !’ Access requests)

Review late-entry and edit requests across exams. Approve only when a correction is justified — grants appear on the audit log.

3.5 Moderate

On an open register, leadership can Moderate marks with a recorded reason (grace adjustments that remain approved).

3.6 Consolidated lists (Marks !’ Consolidated lists)

- Confirm entry max marks (Subjects) and consolidation max (Exams); lock consolidation when ready. Totals scale onto the consolidation ceiling.
- Exam !’ class !’ division. Ready means every subject register is approved.
- Download Excel/PDF. Preview downloads for incomplete divisions are watermarked; official requires full approval.
- Notify teachers for incomplete classes from this screen.

3.7 Hall tickets (Marks !’ Hall tickets)

Create and edit batches (title, venue, instructions; Print student photos when available), preview (With photo), and Download PDF (5 / A4). Ensure paper schedule dates and start times exist under Records !’ Exams for every class that needs tickets (or fill one class and use Copy class timetable to all classes).

Upload photos under Marks !’ Student photos: Bulk upload by admission no (files named like ADM-10B-01.jpg) or one photo per student. PNG or JPEG, 1 MB or smaller. Use Remove unmatched to drop files that did not match.

3.8 Audit log (Marks !’ Audit log)

Co-ordinators see the trail of teacher mark changes, approvals, and access grants. The principal’s wider “all users” view (including co-ordinator actions) is principal-only.

---

4. Insights

Same leadership analysis suite as the principal:

- School overview, Classes, Subjects, Teachers, Students
- Compare (year-on-year and same-subject teachers)

- Deep insights (readiness heatmap, division gaps, improvement cohorts, teacher load, weighted annuals, and more)

  Start from the co-ordinator desk metrics (pending upload, awaiting approval, hardest subject) then drill into Deep insights !’ Exam readiness before results lock.

5. Board ops and CPD

When enabled on the school (and granted in Role access):

- Board ops — paper calendar, report-card publish/sign-off flow, parent notify, revaluation, board packs.
- CPD — plans, observations, appraisals, certificates for any teacher.

6. Parent portal links

Issue portal links for a student and exam so parents can view approved marks at /portal.

7. Notify teachers

Available from Exam queue / Mark progress, consolidated lists, exam records, staff, and the dashboard upload queue. Teachers receive in-app notices (bell + dashboard) with links into the register.

8. Your profile

Account !’ Profile: password, MFA, and contact details for your staff account.

9. Typical co-ordinator checklist (per exam)

- Confirm classes, subjects (entry max, practical max, electives), students, photos, Classes in this exam, and paper dates in Records.
- Set and lock consolidation max marks.
- Verify teacher assignments and timetables; clear Pending leave requests and assign cover.
- Send deadline notices; watch Exam queue !’ Missing.
- Enter/upload marks yourself only for papers you cover or when covering gaps (including Th / Pr where used).
- Approve submitted registers on Exam queue !’ Submitted; handle access requests carefully.
- Check Deep insights !’ Exam readiness and subject difficulty.
- Produce hall tickets (Download PDF (5 / A4)) and official consolidated lists when every paper is approved.
- Support Board ops publish/pack steps if your school uses them.

10. Co-ordinator vs principal

You can	**Principal only**
Enter & bulk-upload marks	Create co-ordinator accounts
Approve / unapprove / moderate	Manage Role access
Manage teachers, records, timetables, leave & cover	Rotate join code
Edit school profile & logo	Toggle optional modules on save
Leadership analytics & CML	Full audit across all roles

Work with the principal on staff access and school-wide policy; own the exam operations queue day to day.
