School Marks Analytics

Generated 2026-09-18

School Marks Analytics — guide for the Principal role.

The principal owns school setup, staff access, mark approval, leadership analytics, and board-facing outputs. Principals do not type or bulk-upload marks; teachers and exam co-ordinators enter registers, and you review and approve them.

1. Sign in and home desk

- Open the app login page.
- Enter your email, school ID, and password.
- If MFA is enabled, enter the 6-digit authenticator code (or a recovery code).

You land on the Principal desk (/): school average, pass rate, distinction/fail counts, register readiness, pending uploads, submitted papers waiting for approval, and shortcuts into Deep insights and Consolidated lists.

- Use the exam selector at the top to switch the working exam. Teachers and leadership share the same latest exam by default.
 - Open the ? hint on any page for a short “what’s on this page” tip.
-

2. First-time school setup

Work through these once per academic year (and whenever structure changes).

2.1 School profile (School setup !' School profile)

- Set school name, short name, board, affiliation, address, and contact details.
- Upload a PNG or JPEG logo — it prints as letterhead on report cards, class summaries, consolidated lists, and Excel downloads.
- Share the staff join code with teachers and co-ordinators so they can request access at /signup. Only the principal can rotate the join code.
- Configure the working week (5 or 6 days) and bell schedule (period names and times) so timetables match your day.
- Set pass percent, distinction minimum, and grade bands before publishing results.
- Set unit / mid / final weights for the annual composite used in Deep insights.
- Optionally enable email digests and optional modules (Board ops, CPD).

2.2 Records (School setup !' Records)

Tab	What to do
Classes	Create class–section rows; assign a class teacher where needed.
Subjects	Add subjects; set Max marks (mark entry); mark electives and enrol students as required.
Students	Add or import the roll; upload photos for hall tickets.
Exams	Create exams; set paper dates (same date for all, or per class/subject); set Max marks [consolidation]; Lock for consolidation when ready.

Promote	After a year, promote a class to the next section without losing prior marks.
---------	---

2.3 Staff (School setup !' Staff)

- Activate pending sign-ups, or add / bulk-import staff (Name, Email, School ID, Password, Role).
- Only the principal can create exam co-ordinator accounts and manage role feature access.
- Assign each teacher to class + subject papers. Teachers cannot enter marks until they are ACTIVE and assigned.
- Open a teacher's timetable from the staff row when needed.

2.4 Timetables (School setup !' Timetables)

- Browse teachers !' open Daily or Weekly views; add or remove periods.
- Use the daily board for every teacher on one day.
- Use Find free to see who is free in a given period.

3. Exam cycle — marks workflow

Teachers enter drafts !' Submit !' Leadership Approve !' Analytics & CML include marks

3.1 Chase and approve (Marks !' Pending uploads)

- Select the exam.
- See teachers with empty registers and papers awaiting approval.
- Notify teachers (deadline, incomplete marklist, or custom message) for everyone still missing marks, or one teacher.
- Open a register !' Approve submitted marks. Only approved marks feed school analytics, ranks, and consolidated lists.
- Use Moderate on the register for grace adjustments with a reason (stays approved and audited).

Principals open registers from Pending uploads (there is no Mark register / Bulk upload item in the principal sidebar).

3.2 Access requests (Marks !' Access requests)

Teachers may ask for late entry after a deadline or to edit a submitted register. Approve only when a genuine correction is needed — every grant is recorded on the audit log.

3.3 Special mark codes

On registers, staff may enter:

Code	Meaning
AB	Absent
EX	Exempt
WH	Withheld

3.4 Consolidated lists (Marks !' Consolidated lists)

- Ensure Max marks (Subjects) and consolidation max (Exams) are set and locked as needed. Lists scale entry marks onto the consolidation ceiling.
- Choose exam !' class !' division.
- Divisions show Ready when every subject register is fully approved.

- Download Excel or PDF. Incomplete divisions can be downloaded as a preview (watermarked). Official download requires full approval.
- From an incomplete class, notify the teachers still missing papers.

3.5 Hall tickets (Marks !' Hall tickets)

- Pick exam, class, and division.
- Create/edit batch details (title, venue, instructions).
- Preview on the right; Download PDF (five tickets per A4). Ensure paper dates and student photos are in place under Records.

3.6 Audit log (Marks !' Audit log)

Principals can filter by role and actor and see mark changes, approvals, and access grants — including exam-co-ordinator actions.

4. Insights and analysis

Open Insights !' Marks analysis (or cards on the hub):

Report	Use it to...
School overview	KPIs, grade mix, toppers, year-on-year movement
Classes	Compare classes/sections; drill into a division
Subjects	Hard papers, class splits, teacher-to-teacher comparison
Teachers	Averages, register status, peer comparison
Students	Search a student; trends, strengths, report card
Compare	Previous years; same-subject across teachers
Deep insights	Outcomes/bands, exam readiness, division gaps, improvement cohorts, promotion carry-forward, teacher load, weighted annuals

Deep insights panels each have their own hint icon explaining the measure and how to act on it.

5. Board ops and CPD (optional modules)

Enable under School profile if your school uses them.

Board ops (School setup !' Board ops)

Per-paper calendar and venues, report-card publish and principal sign-off, parent notify, revaluation workflow, and downloadable board packs.

CPD (School setup !' CPD)

Training plans, lesson observations, appraisals, and certificates. Leadership can open any teacher's CPD file.

6. Parent / student portal

From Records (students / exam context), leadership can issue a portal link for a student and exam. Parents open /portal with that link to see approved marks for that exam only.

7. Notify teachers

Send in-app notices from:

- Pending uploads / dashboards (pending or one teacher)
- Consolidated lists (incomplete class)
- Records !' Exams (deadline reminder)
- Staff (one teacher or all)

Teachers see notices in the bell and on their dashboard, with links into the relevant register.

8. Your profile

Under Account !' Profile: update name/email details, change password, and enable MFA (TOTP). Keep recovery codes safe.

9. Typical principal checklist (per exam)

- Confirm subjects, max marks, roll, and paper dates in Records.
 - Lock consolidation max marks when ready.
 - Confirm teacher assignments and deadlines.
 - Clear Pending uploads — notify, then Approve.
 - Resolve Access requests only when needed.
 - Review Deep insights !' Exam readiness, then school/class/subject reports.
 - Generate official consolidated lists and hall tickets.
 - Publish / sign off report cards (Board ops) if used.
 - Spot-check the Audit log if any result is questioned.
-

10. Principal-only capabilities

Compared with the exam co-ordinator, only the principal can:

- Create and manage exam co-ordinator accounts
- Manage staff role feature access
- Rotate the school join code
- Toggle optional modules (Board ops / CPD) when saving school profile
- View the full audit trail (including co-ordinator actions)

Principals do not enter or bulk-upload mark registers.
